Price Target Risks and Methodology - Kweichow Moutai

Price Target Risks and Methodology - Kweichow Moutai

Valuation methodology: Our 12m TP of Rmb1,667 is based on a 23.4x 2027E P/E, discounted back to mid-2027 using an 8.5% COE. Our target P/E is benchmarked to the company's average P/E in the 2012-2023 full cycle.

Key downside risks: 1) Potential regulation changes such as a consumption tax rate hike; 2) Environmental pollution; 3) A slower-than-expected macroeconomic recovery; 4) Capacity constraints; 5) More volatility in US rate hikes given the negative correlation between Moutai's P/E and the US 10-yr bond yield.
