

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 2.9 billion in 1980 to 4.0 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including improved medical care, increased access to contraception, and a shift in cultural values.

Another reason why the world population is growing so rapidly is that the number of people who are surviving into old age has increased. This is due to a number of factors, including improved medical care, increased access to health care, and a shift in cultural values.

There are a number of challenges that the world population is facing. One of the main challenges is that the world's resources are being used up at an alarming rate. This is due to a number of factors, including increased consumption, increased population, and a shift in cultural values.

Another challenge that the world population is facing is that the world's environment is being degraded at an alarming rate. This is due to a number of factors, including increased pollution, increased deforestation, and a shift in cultural values.

There are a number of ways that the world population can be managed more sustainably. One way is to reduce the number of children born to each woman. This can be done by increasing access to contraception and by shifting cultural values.

Another way is to improve the health care system. This can be done by increasing access to health care and by improving the quality of health care. This will help to reduce the number of people who are dying in old age.

There are a number of other ways that the world population can be managed more sustainably. These include reducing consumption, reducing pollution, and protecting the environment. These actions will help to ensure that the world's resources are used more sustainably.

The world population is growing so rapidly that it is becoming a major concern for the world's leaders. They are looking for ways to manage the world population more sustainably, so that the world's resources are not used up and the world's environment is not degraded.

It is important that we all do our part to manage the world population more sustainably. We can do this by reducing our consumption, reducing our pollution, and protecting the environment. We can also do this by increasing access to health care and by improving the quality of health care.

The world population is growing so rapidly that it is becoming a major concern for the world's leaders. They are looking for ways to manage the world population more sustainably, so that the world's resources are not used up and the world's environment is not degraded.
