

The figure displays a 10x10 grid representing a sparse matrix. The non-zero elements are indicated by colored squares on a black background. The distribution of colors across the rows is as follows:

- Row 1:** Blue square at column 1; Dark Brown square at column 2.
- Row 2:** Red square at column 6; Dark Blue square at column 8.
- Row 3:** Green square at column 2; Brown square at column 4; Dark Blue square at column 6; Dark Brown square at column 7; Cyan square at column 9.
- Row 4:** White square at column 1; Red square at column 2; Dark Brown square at column 5; Blue square at column 7; Dark Brown square at column 8.
- Row 5:** Dark Blue square at column 1; Dark Blue square at column 3; Dark Brown square at column 4; Gray square at column 8; Red square at column 9.
- Row 6:** Dark Brown square at column 3; Dark Green square at column 4.
- Row 7:** Dark Green square at column 5; Dark Blue square at column 6; Green square at column 7; Teal square at column 9.
- Row 8:** Red square at column 1; Pink square at column 3; Dark Brown square at column 4; Olive green square at column 5.
